Professional Summary

Results-driven Senior Frontend Engineer with 9 years of experience architecting and delivering high-impact solutions for the fintech, banking, and insurance sectors. Expert in modern frontend frameworks including React, Next.js, and Angular, with a proven track record of enhancing system performance, leading development teams, and accelerating deployment cycles. Spearheaded projects that increased code reusability by up to 40% and reduced development time by 25%, consistently exceeding client expectations.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, Python, Ruby
 - **Frameworks & Libraries:** React, Next.js (App Router), Angular, Redux, Node.js, MUI, Tailwind CSS, Gatsby, Styled Components, Jest, React Testing Library, Django, Ruby on Rails, NativeScript
 - **Databases:** PostgreSQL
 - **Tools & Platforms:** Git, GitHub, Docker, Jenkins, Vercel, Netlify, Storybook, Bit.cloud, Contentful, Salesforce Interactions SDK, WordPress, Magento, Shopify, Azure
 - **Methodologies:** Agile, Microservices, RESTful APIs, CI/CD, Server-Side Rendering (SSR), OAuth, OpenID Connect, OWASP, Component-Driven Development
-

Professional Experience

Senior Frontend Engineer | IDM TECHNOLOGY | Remote May 2025 - Present Project: Salesforce MCP & QSR eCommerce Integration | Pídelo - Franquicias Peru Delosi S.A.

- Led the technical implementation of a Salesforce Marketing Cloud Personalization (MCP) integration with a QSR eCommerce platform using Next.js (App Router).
- Engineered a high-performance solution for dynamic category rendering and real-time event tracking, ensuring zero impact on site performance and maintaining a rapid user experience.
- Successfully launched the initial phase, enabling personalized banner displays based on user navigation and validating the data-driven personalization strategy.

Senior Fullstack Engineer | INDEPENDENT CONSULTANT | Remote September 2023 - March 2025 Project: Complaints & Claims System | Asociación de Bancos del Perú (ASBANC)

- Spearheaded a 4-developer team, implementing Agile methodologies that reduced delivery time by 3% and achieved a 100% on-time milestone completion rate.
- Architected a component-based design system in Angular and Tailwind CSS, boosting code reusability by 40% and cutting maintenance overhead by 25%.
- Enhanced cross-functional collaboration between backend and frontend teams, streamlining integration and accelerating the deployment cycle by 20%.

Senior Software Engineer | WHITE PROMPT | Remote July 2022 - August 2023 Project: Funding Management System | Libertas Funding, LLC

- Directed a frontend team in building a crowdfunding MVP from the ground up using React and MUI, contributing to a 4% reduction in overall delivery time.
- Orchestrated the seamless integration of third-party APIs including Ocrolus and Experian, enhancing platform security and data verification capabilities.
- Implemented a comprehensive testing strategy that achieved 99% test coverage and reduced defect density by 15%.

- Designed and developed scalable REST API services with Node.js and PostgreSQL, shortening the deployment cycle by 20%.

Semi Senior Web UI Developer | GLOBANT | Remote June 2021 - June 2022 Project: Modern Greeting Experience | Hallmark Cards, Inc.

- Developed pixel-perfect, reusable UI components from Figma designs using React, maintaining 100% design accuracy and 98% unit test coverage.
- Spearheaded the migration of the component library to Bit.cloud, improving component reuse across enterprise projects by 25%.
- Mentored new developers, improving team productivity by 15% within the first quarter.
Project: Cocos y Lucas Money Exchange | Banco de Crédito del Perú (BCP)
- Guided technology stack selection by delivering a successful Proof of Concept (POC) for a mobile application using NativeScript, validating its feasibility and scalability.

Engineer | NTT DATA | Remote September 2020 - June 2021 Project: Customer and Identity Access Management (CIAM) | Banco de Crédito del Perú (BCP)

- Executed a pivotal Proof of Concept in Angular for secure authentication flows, resulting in a 20% reduction in API response times.
- Developed robust components and resolved critical bugs, improving system stability and decreasing post-deployment issues by 30%.
Project: Digital Procedures Migration | AFP Prima
- Re-architected the frontend with modern state management and component patterns, reducing new feature development time by 40%.
- Designed and developed responsive interfaces in React, increasing user engagement by 25%. **Software Developer** | AKIGROUP S.A.C. | Lima, Peru January 2016 - August 2020
- Developed and maintained websites and e-commerce shops for a diverse client portfolio using Django, Ruby on Rails, React, and various CMS platforms (WordPress, Magento, Shopify).
- Designed and implemented responsive layouts and reusable components, reducing average project delivery time by 20%.
- Achieved a 95% client satisfaction rate and drove an average 15% increase in user engagement across managed websites.

Education

Informatics and Systems Engineer

Technological University of Peru (UTP) - Lima, Peru, 2009-2014

Full-stack Javascript Web Developer Specialization (500 hours)

Universidad de Ingeniería y Tecnología (CodiGo) - Lima, Peru, 2020

Certifications & Complementary Studies

- **CS50's Introduction to Artificial Intelligence with Python**, HarvardX (In Progress)
- **Advanced Training:** Clean Architecture, Async JavaScript, React Advanced Patterns, Ruby on Rails (Pluralsight, O'Reilly, 2024)
- **Corporate Training:** Gatsby, Redux, RxJS, SEO and Analytics, React Testing Library (Udemy, 2022)

Languages

- **English:** B2 Professional Proficiency
- **Spanish:** Native
- **French:** A2 Elementary Proficiency
